

EAST COAST POOLS

STYLISH OUTDOOR LIVING

DESIGNING SUPERIOR SWIMMING POOLS

The owners of the featured pool requested a multi-functional pool which incorporated a range of design features. This included ensuring it would be suitable for family fun, entertaining, exercise and also have aesthetic appeal. In conjunction with the homeowners, the design was undertaken by Colin Sloggett at East Coast Pools in conjunction with Graham Bradtke from Live in Landscapes.

The siting of the pool maximised available space as it was positioned back and to one side. This allowed room for synthetic grass outside the pool for children to play. The use of materials integrated the pool with the home effortlessly, including the use of white polished concrete and sawn Victorian bluestone. A frameless glass fence completes the look and ensures no views are interrupted.

The 7.5m x 3m concrete pool is fully tiled with white tiles. It is equipped with energy saving features including Hurlcon Viron high-efficiency multi-speed pumps, an in-floor cleaning system and Austral solar heating. It also has a Viron gas heater so the pool can be used year round, a Zodiac self-cleaning chlorinator, and Spa Electrics LED lighting.

East Coast Pools specialise in concrete in-ground pools and spas, and predominantly build in the Mornington Peninsula and Bayside. They build a small number of pools each year to maintain the highest levels of customer service.

Established in 2001, East Coast Pools continue to maintain a commitment to quality, service and attentive project management. Owner Colin Sloggett has more than 25 years of experience in swimming pool and landscape construction, and together with his skilled team, will design and construct your swimming pool, spa and landscape, looking after your entire project, from initial concept to design and construction.

East Coast Pools' emphasis on quality can be seen at all stages of the design and construction process, with the use of quality, state-of-the-art materials and techniques, together with reputable and reliable tradespeople.

At East Coast Pools, beautiful pool designs, combined with imagination, quality workmanship and attentive project management, will ensure your finished pool looks as good as it feels.
